

Accurate & Reliable

HOW DO WE DEFINE ACCURACY?

Nothing is more important to us than accuracy. Kroger's blood pressure monitors have been clinically validated and cleared by the FDA (510K). They have also been independently tested and validated as having the highest possible accuracy (A/A) by the British Hypertension Society, the leading institution for testing monitors.

Cardiologists recommend the use of home blood pressure monitors, in conjunction with their physician's care, as a simple and effective way to help manage hypertension.

Kroger's blood pressure monitors help by delivering medical grade accuracy, quality, and ease of use that allow consumers to take control of their health.

NEED INSTRUCTION MANUALS?

Did your customer misplace their instructions? Do they need a replacement cuff? Looking for quick start guides to help a customer?

- Flyer - Blood Pressure Monitors
- Consumer Brochure

CUSTOMER QUESTIONS? WE'RE HERE TO HELP!

100% U.S. Based Customer Service Team

Taking blood pressure is easy once a customer knows the basics, but getting it right can be confusing. Since blood pressure naturally fluctuates throughout the course of any given day, your customer might be unsure if they're taking their readings correctly. Whether they are new to taking their blood pressure, or just want to confirm their readings are accurate, we have a dedicated team to coach them through the process.

Customer Service 1-800-568-4147, we're here to help!
